

Lynx

Innovative Cleaning Solutions

Metal Finishing / Parts Cleaning

Choose Lynx
for custom formulated
detergents and process chemicals,
when parts cleaning is crucial.

Lynx custom formulates for your specific parts cleaning applications.

- » Blends of synthetic detergents, emulsifiers, and wetting agents
- » Products that can be used in all types of immersion or spray equipment (single step or multi-step systems)
- » Cleaners that are safe on all materials
- » Phosphatizers suitable for all types of finishes
- » Additives that work effectively in hard or soft water

Phosphatizing product lines

- » Liquid and Powdered Cleaners - a wide range of cleaners that remove most oils and various soils, rinse completely, and tolerate hard water conditions with controlled foam levels at various temperatures.
- » Paint Lok 500 series - Iron phosphates (Moly, SNBS, & HAS accelerated) that remove soils, while simultaneously depositing a high quality Iron Phosphate coating on steel; also will etch aluminum and galvanized to enhance paint adhesion.
- » Paint Lok 600 series - Zinc phosphates that deposit a high quality coating (150 to 250 mg/ft² minimum for spray; 300 mg/ft² minimum for immersion) on steel and galvanized. Also, coatings from 1,500 to 2,500 mg/ft² are possible for break-in, anti-galling, and to hold corrosion inhibitors.
- » Paint Lok 700 series - Zirconium oxide coatings that are phosphate-free for use in multi-stage spray washer and immersion systems for processing ferrous, aluminum, and galvanized metals prior to painting.
- » Sealers - Products used after iron or zinc phosphate pre-treatment that are non-chromated, remove unwanted salts from the treated surface, provide increased corrosion protection, and insure a receptive substrate desirable for painting.

Materials cleaned

- » Exotic metals
- » Industrial alloys
- » Copper, brass, aluminum
- » Carbon steel
- » Stainless steel
- » Plastics

Soils cleaned

- » Gear oil
- » Transit coating
- » Lapping compound
- » Ink and paint resins
- » Grease
- » Cutting oils and coolants
- » Other process oils

Product Options

- » Low or no foam
- » Demulsifying
- » Nonemulsifying
- » Emulsifying
- » Rust inhibiting
- » Nonbutyl
- » Nonphosphate
- » Compatible with filtration, oil-removing, or wastewater treatment systems

Parts cleaning equipment types

- » Automated conveyor-belt degreasers
- » Tumblers
- » Rotation immersion jet-cleaning systems
- » High pressure cabinet washers
- » Vibratory equipment
- » Sink and Soak tank washers
- » Ultrasonics
- » Multiple stage washers

The most efficient way to manage your cleaners and process chemical inventory is the Lynx Drum-Buster® program.

Eliminate costs associated with delivery and disposal of drums, along with the waste inherent in using drums. Using a single, refillable tank, the Drum-Buster® program maximizes both cleaning operation efficiency and safety for your employees.

Order exactly what you need. Lynx provides the free storage system to you, and your cleaning solution is pumped directly into a Drum-Buster® storage tank, using a metered delivery pump. You are billed for only what you use, which in turn, controls costs and maximizes operations. Eliminate the time spent changing barrels, hauling products and taking inventory. The Lynx Drum-Buster® program provides the safest way to handle these chemicals.

Your Drum-Buster® Tank is designed specifically for your needs. Your Lynx representative will help you design a total storage system tailored to your size, cleaning operations and environmental restrictions.

Along with specially designed formulations, the Lynx Drum-Buster® program is designed to work with our complete line of specialty equipment. Your Lynx representative can show you how the Total Lynx System will maximize efforts while controlling cleaning costs.
